

# KID COVID Fights Back!

Introducing KID COVID -  
Ready to spring to action  
to keep you safe.

See how the Kid fights off  
Novel Coronavirus,  
knocking it out cold

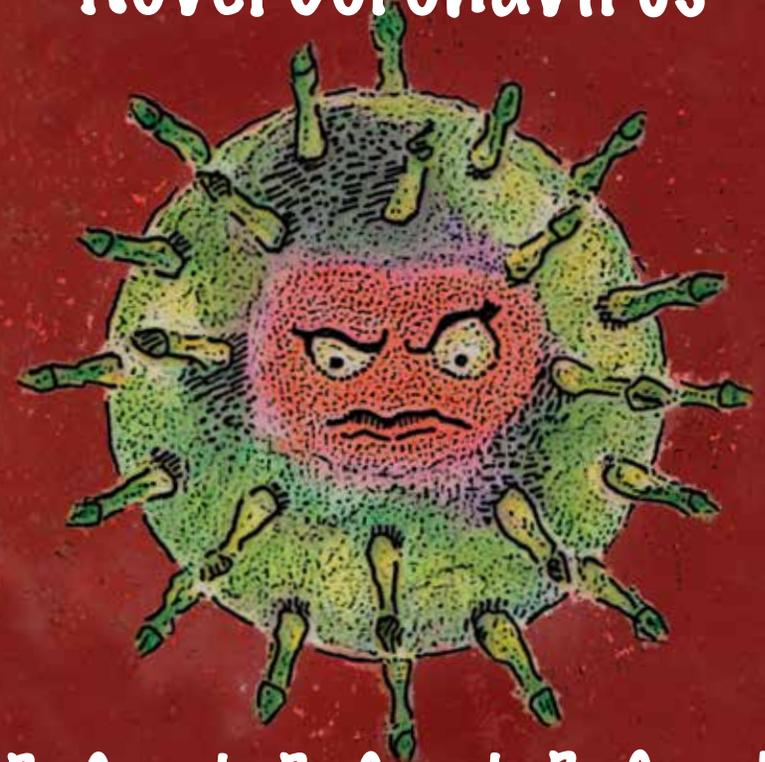

Built-in  
Hand-Sanitizer  
Spray

Springs in the Soles  
of the Shoes to  
Spring out of Virus' Way

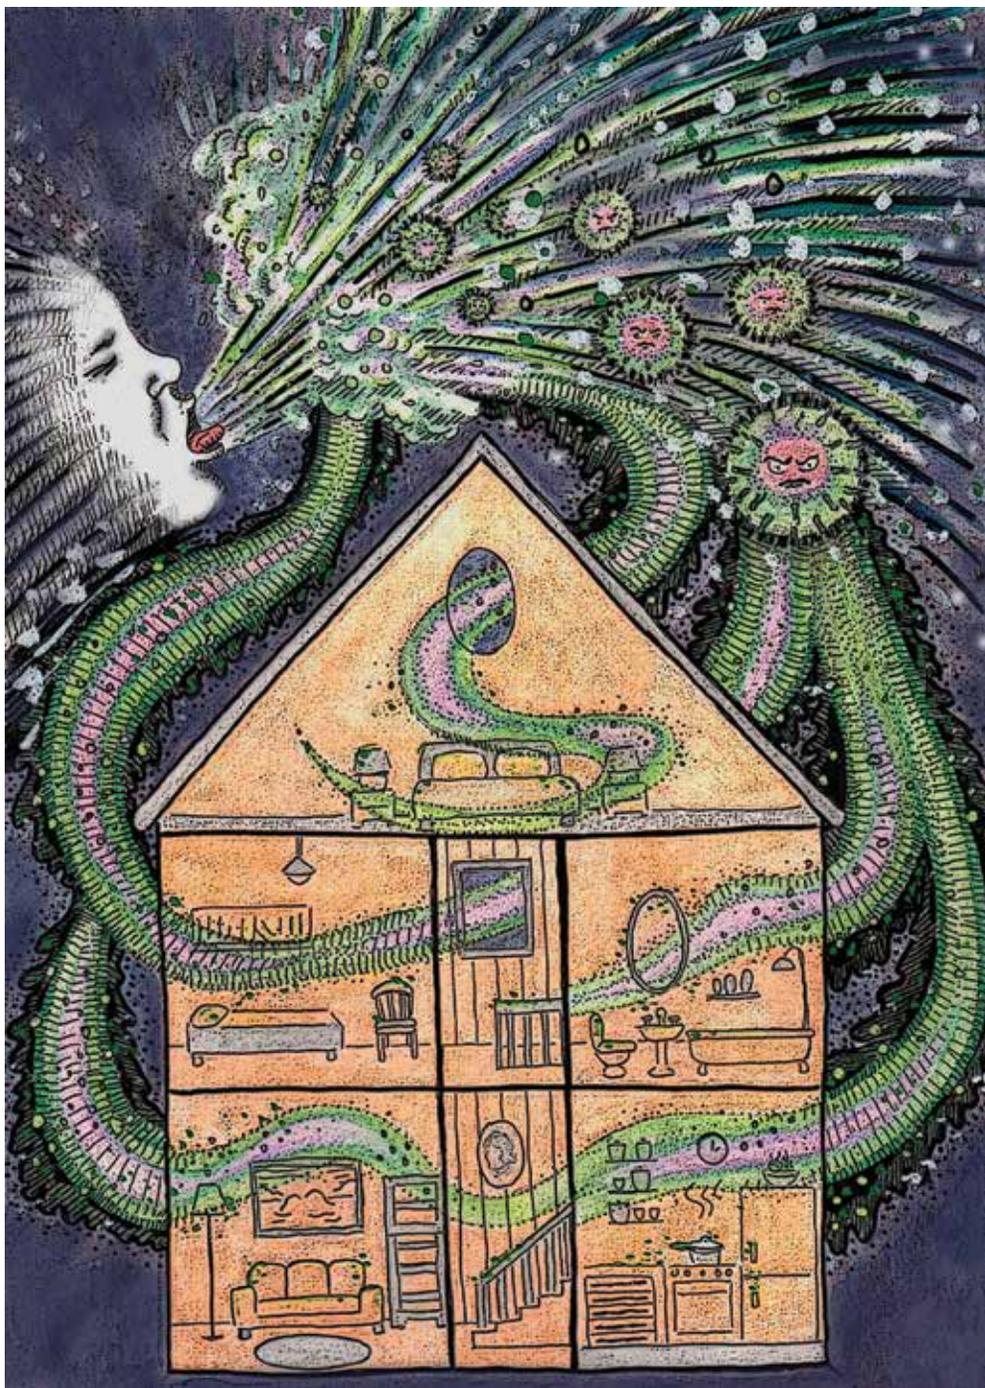

The Kid is up against a very nasty virus called  
Novel Coronavirus. Here's a picture of the Virus.

## Novel Coronavirus

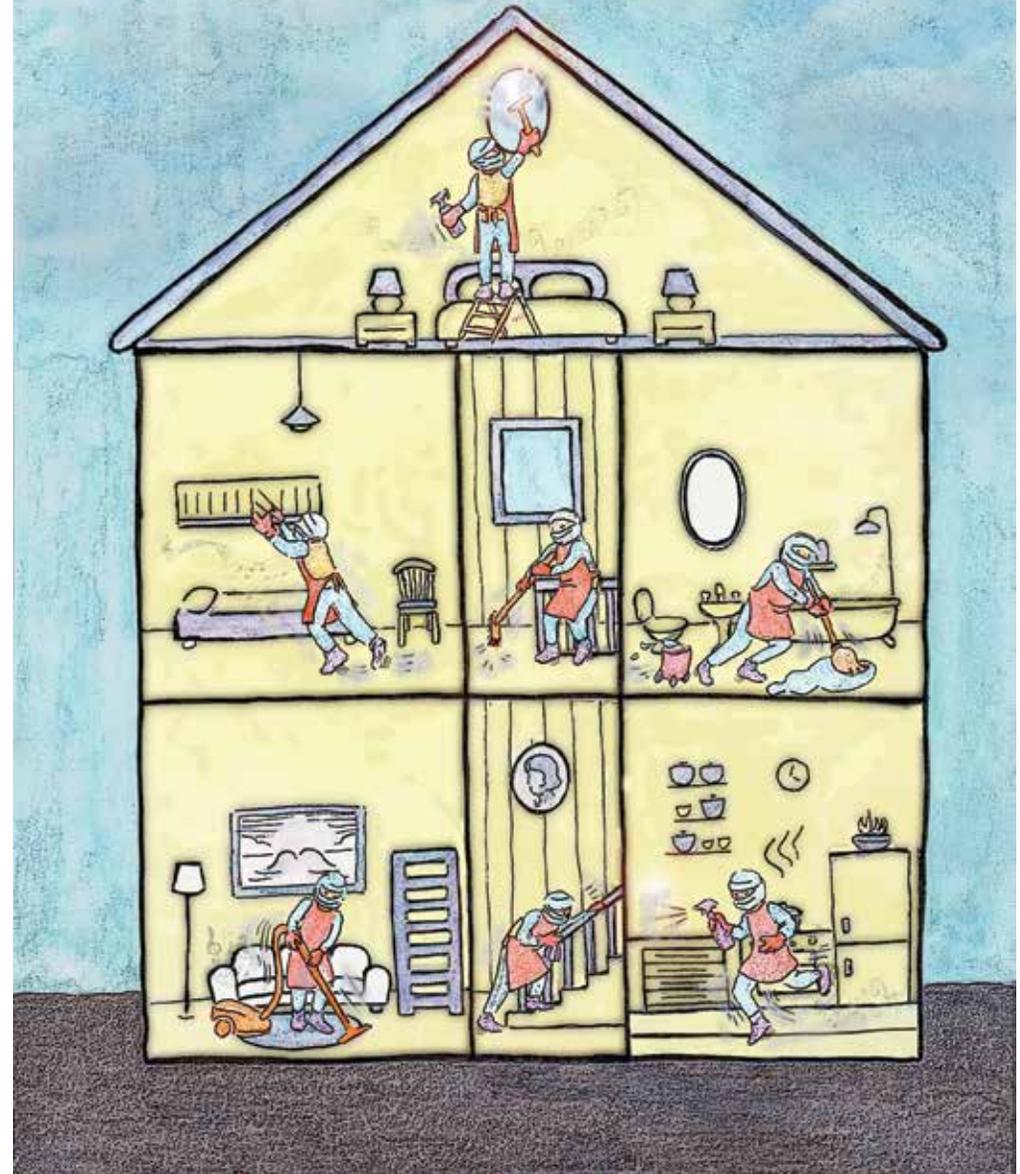

**Be Gone! Be Gone! Be Gone!**

The Virus can make you very sick. It is  
especially dangerous to people  
like grandparents.

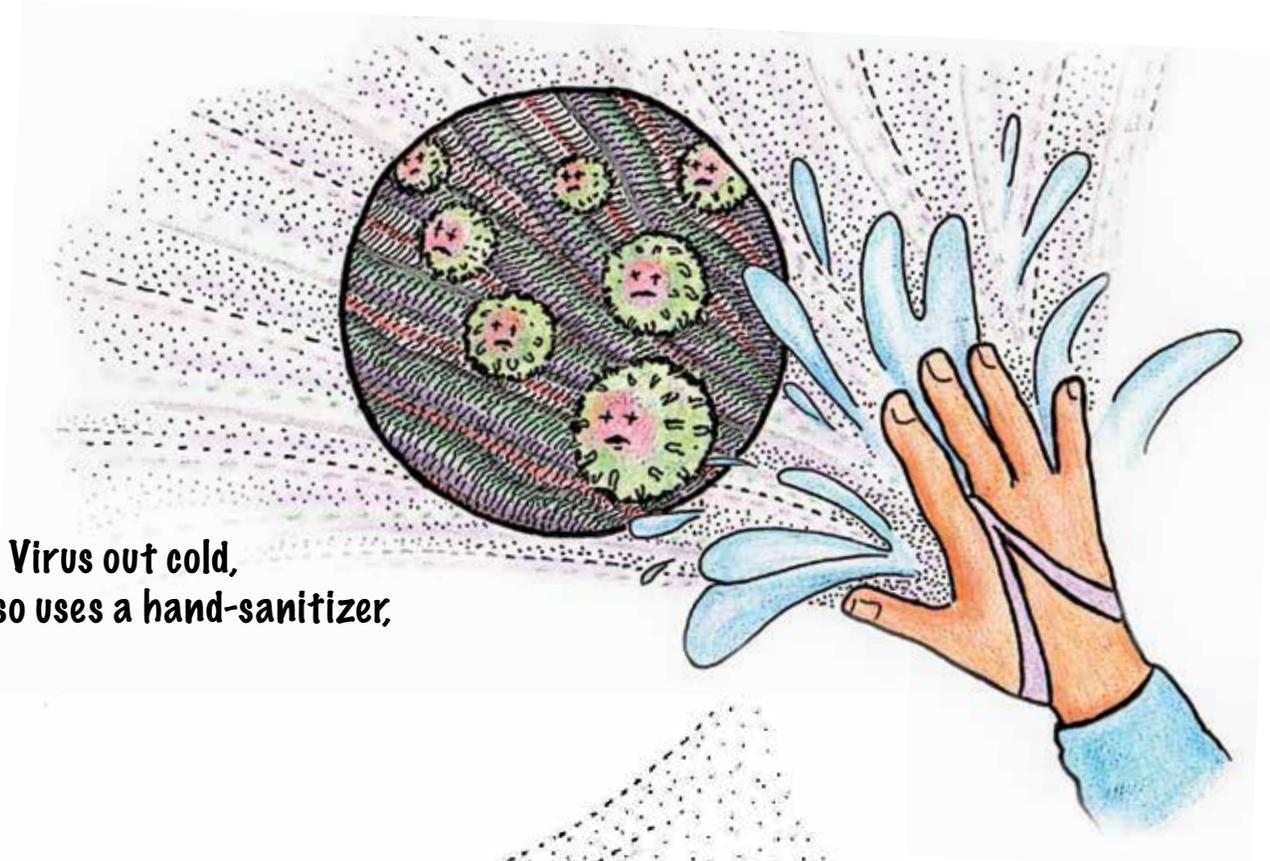

Sometimes the Virus spreads through a cough, landing on surfaces. Because the Virus is so small, it is invisible to your eyes. Even with its small size, the Virus is powerful and can harm you. So how do you get rid of the Virus?

Kid COVID has super speed. The Kid wipes down surfaces faster than anyone, and likes to speed clean while listening to music.

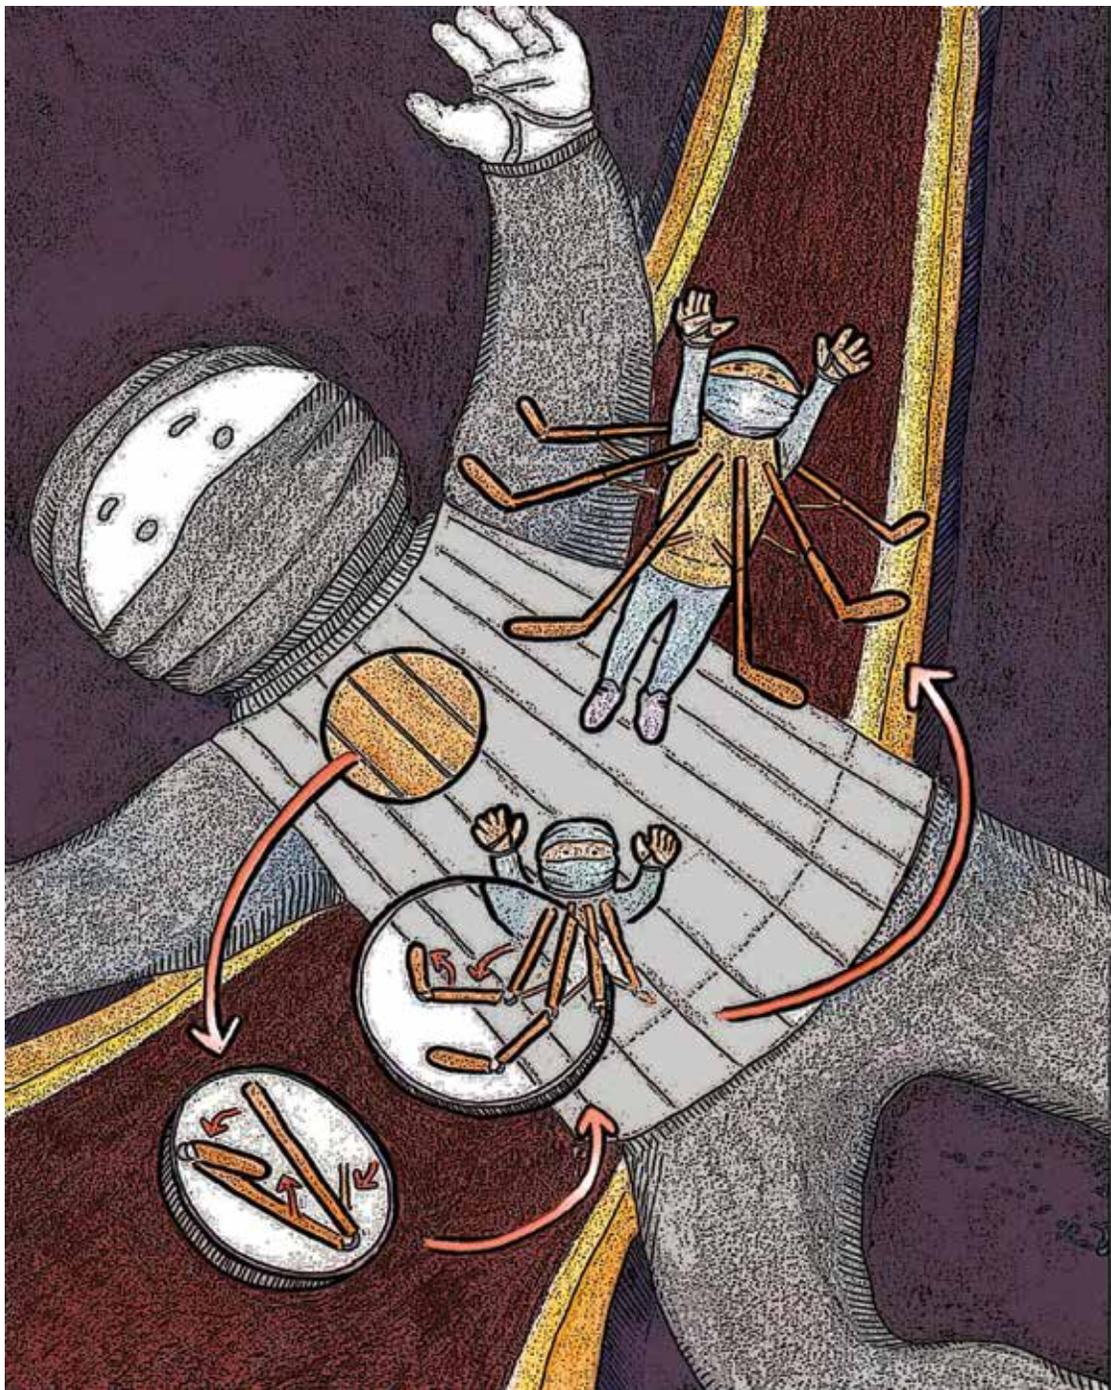

You can deep clean the surfaces, knocking the Virus out cold. Let's see how Kid COVID fights off the Virus.

To knock the Virus out cold,  
Kid COVID also uses a hand-sanitizer,

and a disinfectant for surfaces.

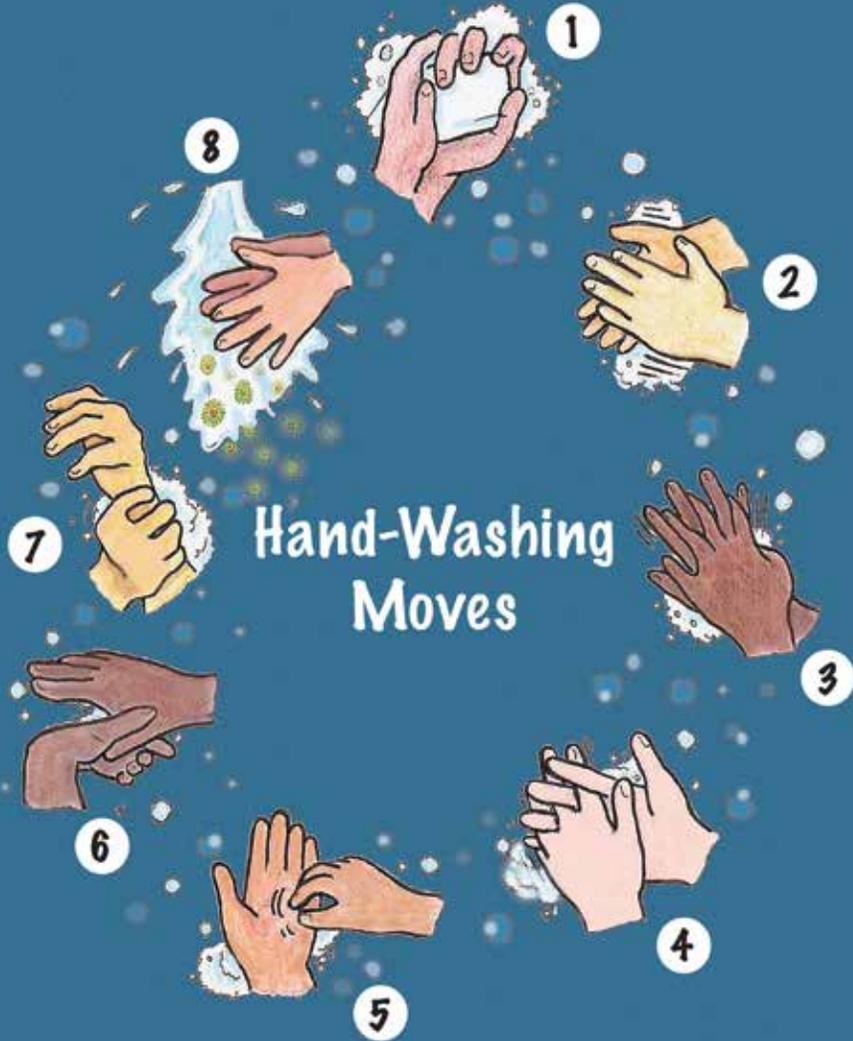

**Kid COVID has a special outfit including:  
built-in hand sanitizer spray -and- special  
springy shoes to spring out of the Virus' way.**

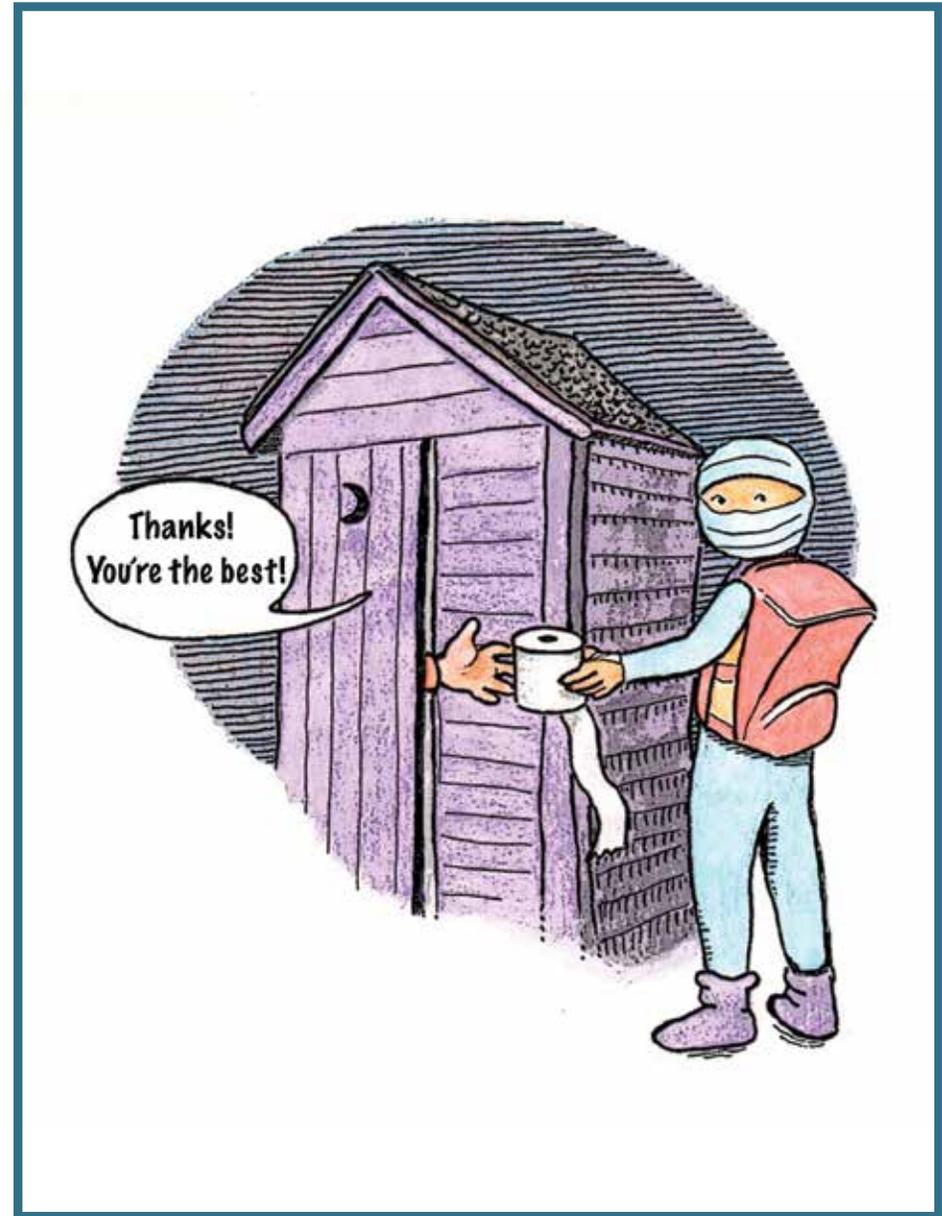

**Kid COVID's Hockey Stick Suit is designed  
to keep everyone a safe distance  
of two hockey sticks apart.**

**Kid COVID is a hand-washing champ. Here are the 20 second hand-washing moves that you can do too:**

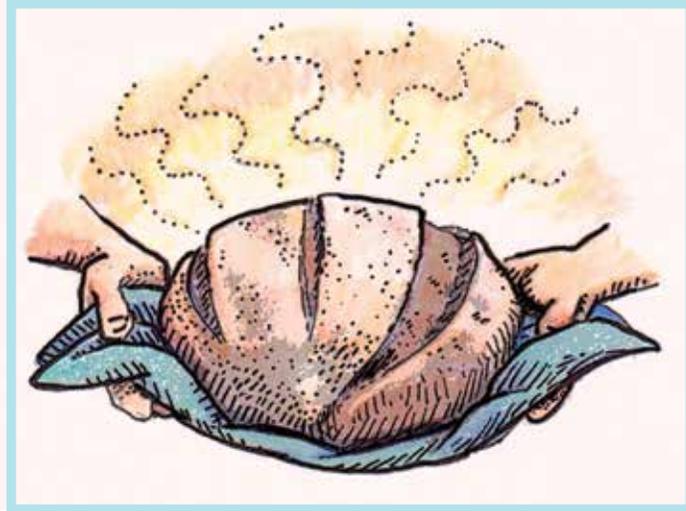

1. Lather up with soap
2. Rub hands together
3. Wash back of both hands
4. Criss-cross fingers, moving them up and down
5. Press finger tips to palm, moving them in small circles, repeat for other hand

6. Grab the thumb, squeeze and rotate hand forwards and backwards, repeat for other thumb
7. Rub soapy lather around both wrists
8. Rinse off both hands

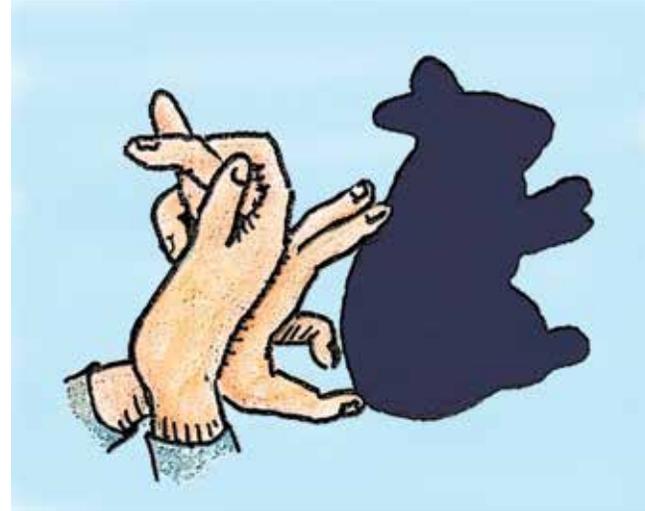

**The Kid also has a backpack full of supplies, including toilet paper, to give to those in need.**

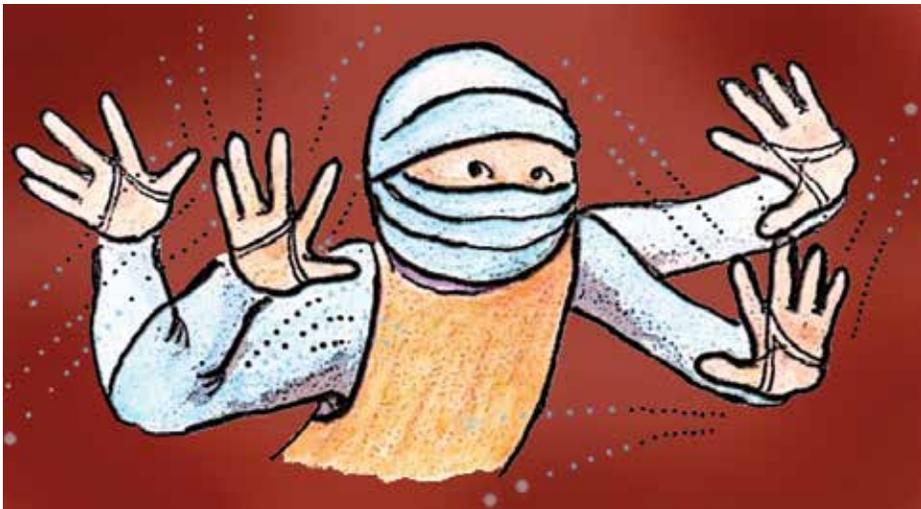

**Kid COVID has super staying-at-home powers. While at home the Kid enjoys:**

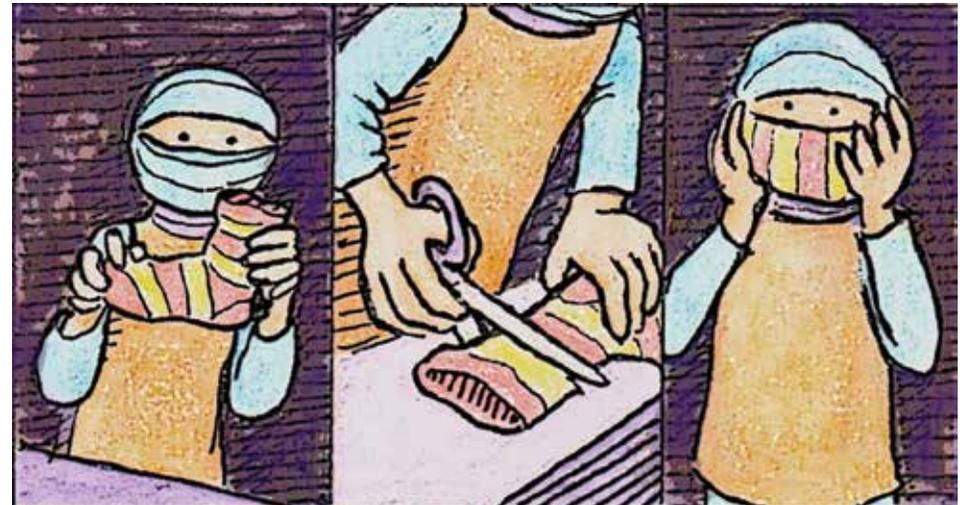

**baking bread**

**making shadow puppets**

**practicing on-line mime lessons**

**Doing crafts such as making masks from socks**

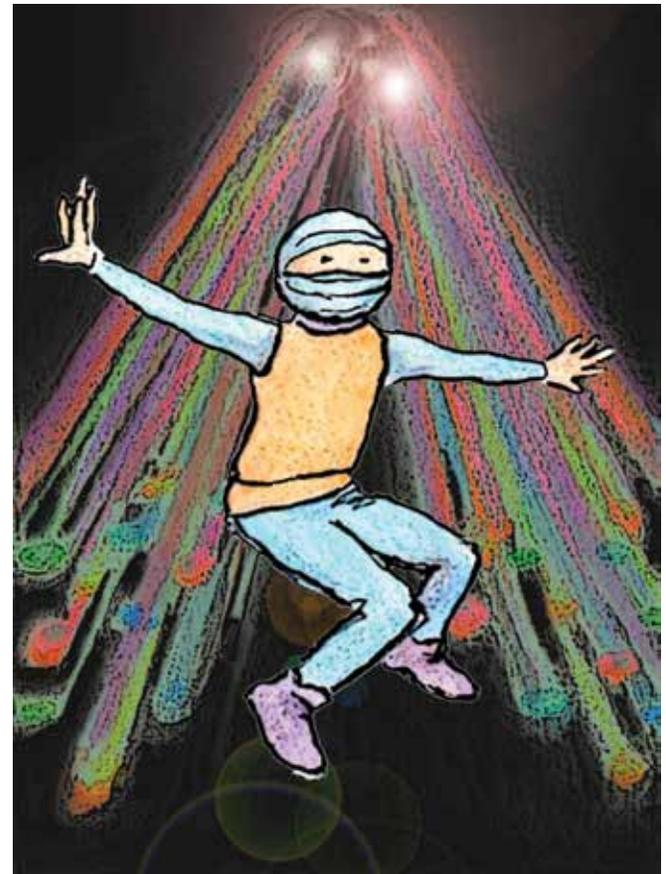

putting together puzzles

visiting on-line art galleries

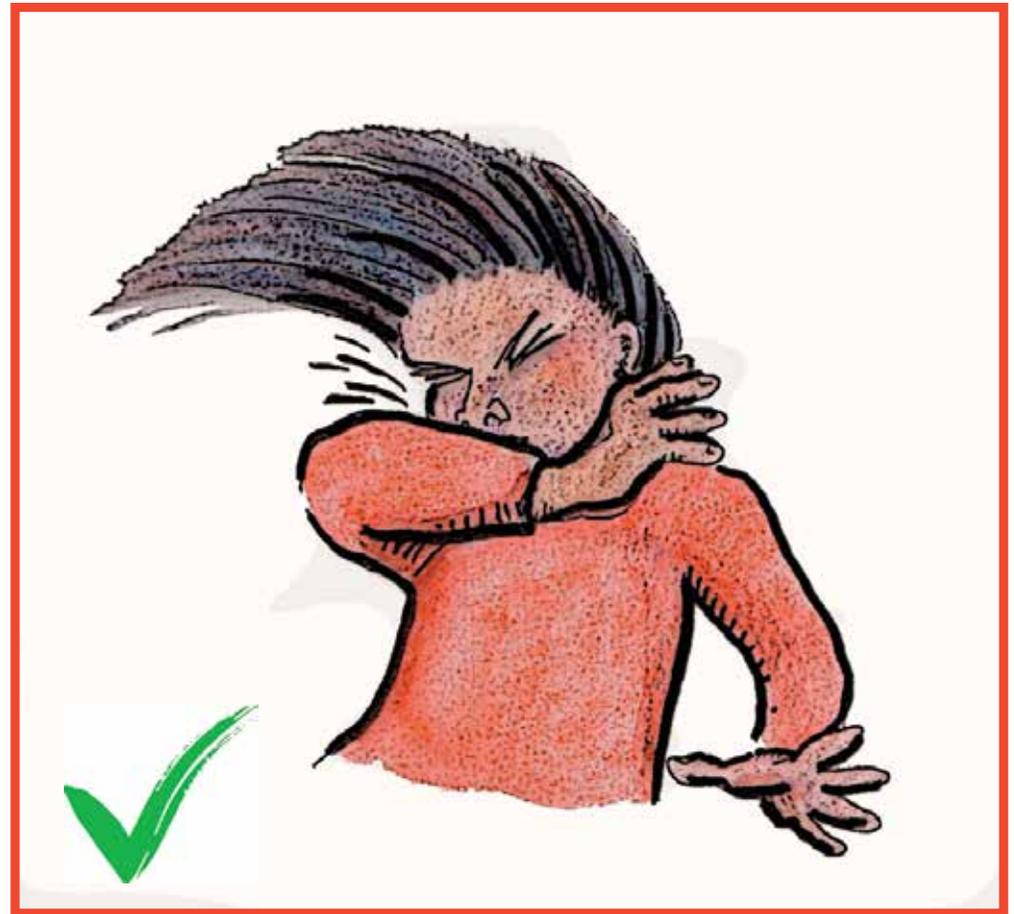

reading books

dancing to music

To prevent spreading the Virus Kid COVID asks you to avoid touching your eyes, nose and mouth, which are ways the virus enters our bodies.

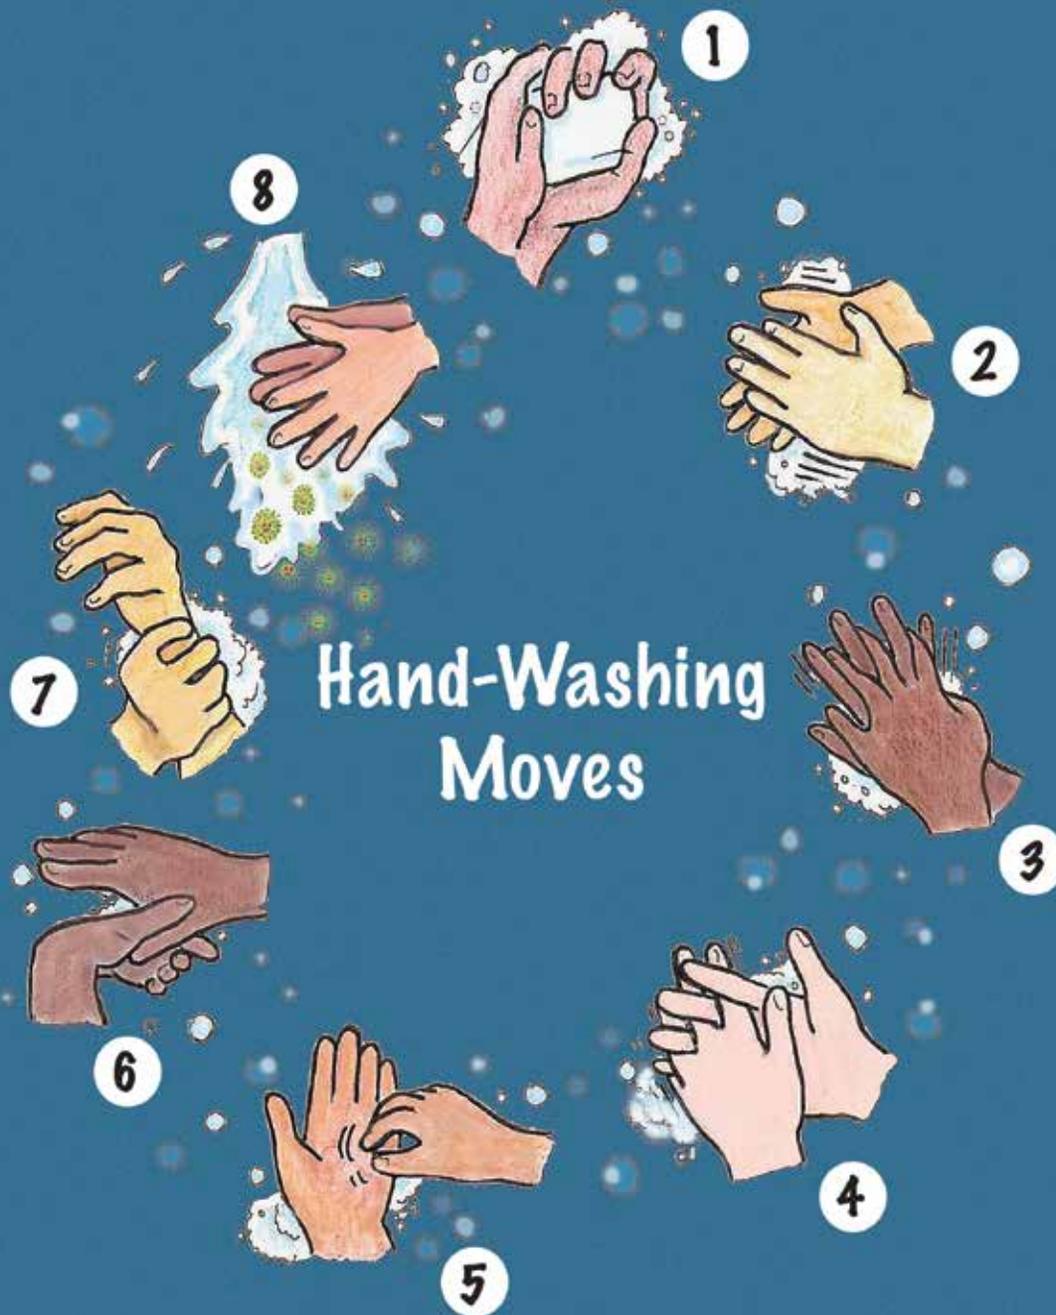

If you have to sneeze or cough, sneeze or cough into a tissue or your elbow.

**You too can be like Kid COVID  
knocking the virus out cold.**

## 20 Second Hand-Washing Moves

1. Lather up with soap
2. Rub hands together
3. Wash back of both hands
4. Criss-cross fingers, moving them up and down
5. Press finger tips to palm, moving them in small circles, repeat for other hand
6. Grab the thumb, squeeze and rotate hand forwards and backwards, repeat for other thumb
7. Rub soapy lather around both wrists
8. Rinse off both hands
